THANKSGIVING PROCLAMATION.

[BY A. P. NIGHT WIRE.]

WASHINGTON, Nov. 17.—President Wilson, in a proclamation today, designated Thursday, November 22, as Thanksgiving Day and said this year the American people have special and moving cause to be grateful and rejoice. Complete victory, he said, has brought not only peace, but the confident promise of a new day as well, in which "justice shall replace force and jealous intrigue among the nations."

The proclamation follows:

By the President of the United States of America.

A PROCLAMATION.

It has long been our custom to turn in the autumn of the year in praise and thanksgiving to Almighty God for His many blessings and mercies to us as a nation. This year we have special and moving cause to be grateful and to rejoice. God has in His good pleasure given us peace.

It has not come as a mere cessation of arms, a mere relief from the strain and tragedy of war. It has come as a great triumph of right.

Complete victory has brought us, not peace alone, but the confident promise of a new day as well, in which justice shall replace force and jealous intrigue among the nations. Our gallant armies have participated in a triumph which is not marred or stained by another purpose of selfish aggression. In a righteous cause they have won immortal glory and have nobly served their nation in serving mankind.

God has indeed been gracious. We have cause for such rejoicing as revives and strengthens in us all the best traditions of our national history. A new day shines about us, in which our hearts take new courage and look forward with new hope to new and greater duties.

While we render thanks

for these things, let us not forget to seek the Divine guidance in the performance of those duties, and Divine mercy and forgiveness for all errors of act or purpose, and pray that in all that we do we shall strengthen the ties of friendship and mutual respect upon which we must assist to build the new structure of peace and good will among the nations.

Wherefore, I, Woodrow Wilson, President of the United States of America, do hereby designate Thursday, the twenty-eighth day of November next as a day of thanksgiving and prayer, and invite the people throughout the land to cease upon that day from their ordinary occupation and in their several homes and places of worship to render thanks to God, the ruler of the nations.

In witness whereof, I have hereunto set my hand and caused the seal of the United States to be affixed.

Done in the District of Columbia this sixteenth day of November in the year of our Lord, one thousand, nine hundred and eighteen, and in the independence of the United States of America the one hundred and forty-third.

(Signed)

WOODROW WILSON.

By the President.

Robert Lansing, Secretary of State.

While we render thanks

for these things, let us not forget to seek the Divine guidance in the performance of those duties, and Divine mercy and forgiveness for all errors of act or purpose, and pray that in all that we do we shall strengthen the ties of friendship and mutual respect upon which we must assist to build the new structure of peace and good will among the nations.

Wherefore, I, Woodrow Wilson, President of the United States of America, do hereby designate Thursday, the twenty-eighth day of November next as a day of thanksgiving and prayer, and invite the people throughout the land to cease upon that day from their ordinary occupation and in their several homes and places of worship to render thanks to God, the ruler of the nations.

In witness whereof, I have hereunto set my hand and caused the seal of the United States to be affixed.

Done in the District of Columbia this sixteenth day of November in the year of our Lord, one thousand, nine hundred and eighteen, and in the independence of the United States of America the one hundred and forty-third.

(Signed)

WOODROW WILSON.

PAPER OFF START WAR WAR WORK. ON WILSON

No Sudden Change Contemplated. Republicans Seek Full Control.

Industries Board Withdraws Priorities to Permit Work on Civilian Needs.

Government Faces Intricate Problem Turning Factories Back to Peace Basis.

EXCLUSIVE DISPATCH.
WASHINGTON, Nov. 17.—Assistant Secretary of War Crowell, as director of munitions, discussing the policy of reconstruction with reference to munitions, said that the War Department had set up two standards with reference to contract readjustments.

The first standard is to make the country, which has been equitably with regard to industry and labor.

They must be made promptly to safeguard financial elements of the big problem involved.

"With the signing of the armistice," said Secretary Crowell, "the War Department is faced with an intricate problem and great responsibility. The industries of the country have responded wholeheartedly to the call of the government for increased production and which were going at a rate never before attained, must be diverted from war-time production to their normal occupations in time of peace.

The first and primary consideration in getting back to this normal basis is to make this readjustment with as little inconvenience as possible and with a continuous employment of labor.

"It is also essential that the production of material for war, which means now a waste of material which could be used for the civilian population both here and for the purpose of reconstruction in Europe, should be stopped as speedily as is consistent with the primary consideration of labor and the industries."

"Instructions have therefore been issued to all bureaus of the War Department, governing the methods of slowing down of production, so that, as far as possible, there should be a tapering off of war work, giving time for industrial readjustment and for the industry to take up civilian work."

So that the moment had arrived as rapidly as possible get into work on civilian needs, at our request the War Industries Board has with drawn all priority ratings in army work.

"No order is being suspended or cancelled by the War Department without consideration of the nature of the work or the locality in which the work is being performed, and such places in other industries, and without conference and consultation with the War Industries Board, which has been constantly in touch with the industries of this country, and with the Department of Labor, which is in intimate touch with the conditions of employment in all parts of the United States."

"Over time, holiday and Sunday work has been stopped and as rapidly as possible and as rapidly as the labor can be used in normal day shifts night shifts will be discontinued. It is often the case that in a certain locality where labor is working on a war project, this work may be stopped and the same labor utilized on other work in the same locality."

"During the war, production has been largely diverted from articles called for in times of peace to war necessities, and civilian needs have been curtailed and non-essential industries rapidly curtailed and the industries proportionately freed to work on civilian needs. Industries which have been largely concentrated in certain lines, with resultant congestion of transportation with great influx of labor in this area, with inadequate facilities for housing, etc., are being taken into consideration in this readjustment."

COMMUNITY LABOR BOARDS.
In order to meet the urgency of the situation, the Department of Labor will provide the necessary machinery by using the community labor boards of the United States employment service, with one important change. The boards as now constituted are more or less voluntary organizations composed of one representative of the industry, one of organized labor and one of the community.

There are 1600 of these boards in the country. The plan is to appoint a paid representative in each community.

GERMANY'S WARSHIPS.
[BY ATLANTIC CABLE AND A. P.] STOCKHOLM, Saturday, Nov. 16.—The German armored coast defense vessel Beowulf arrived late last night in the Northern Stockholm archipelago. The vessel will be interned.

Other vessels of the German Baltic fleet are expected to arrive in Swedish waters.

Pershing's Men Prepare to Occupy Rhine Forts; Huns Surrender Their Big Guns

[BY ATLANTIC CABLE AND A. P.]

WITH THE AMERICAN ARMY IN FRANCE, Nov. 17, 6:15 p.m.—Every road leading eastward from the Meuse was filled with columns of American troops from morning until night, the men marching or traveling on vehicles of various kinds the general direction of east by northeast.

At different outposts where the "jump-off" was made before daylight Sunday the Americans had hauled great piles of supplies, which already have started to move up for use by the advancing troops.

WITH THE AMERICAN ARMY NORTHWEST OF VERDUN, Nov. 17.—Forty-two large caliber guns, including two of sixteen inches, were turned over to the Americans at Spincourt Saturday by a German lieutenant. He was given receipts by two officers of the American First Army.

GERMAN WARSHIPS ALLIES WILL TAKE.
[ATLANTIC CABLE-EXCLUSIVE DISPATCH.] LONDON, Nov. 17.—The surrender of the German warships demanded by the Allies under the terms of the armistice is expected to include the following ships:

The ten battleships which it would be natural to select are the Kronprinz Wilhelm and Bayern, both new dreadnaughts completed since 1916; the Markgraf, Konig and Grosser Kurfurst of the Konigsdreadnaught class, completed in 1914 and 1915, and the Kaiser, Kaiserin, Prinzregent Luitpold, Konig Albert and Friedrich der Grosse, all dreadnaughts of the Kaiser class, completed in 1912 and 1913.

Five battle cruisers, the Derfflinger, Hindenburg, Seydlitz, Moltke and Von der Tann, are apparently all that Germany has. The armistice terms stipulate for the surrender of six.

Eight of the most recent light cruisers are the Brunner, Bremen, Karlsruhe, Pillau, Frankfurt, Neuenburg, Koeln and Dresden.

Surface warships which are left to Germany will be concentrated in one or more of the German ports. They will be paid off and completely disarmed and will be under the supervision of a commission of the allied powers.

Regarding the Black Sea, arrangements are now being made for the surrender of all ships in German hands. It seems now to be practically certain they will be surrendered without trouble.

PARIS, Nov. 17.—The official statement of the advance of the Allies along the front says: "The French army, quitting the line of the Meuse, resumed this morning its forward march to occupy the region evacuated by the enemy. The frontier on the whole of the front our troops penetrated Belgium and annexed provinces (Alsace and Lorraine) at present there is not a single one of the enemy on our national territory. The liberated population everywhere greeted the liberators enthusiastically."

"On our left we have gone beyond Munster, Coire and Purnay, crossed the Remoy and reached Carignan, after having occupied the towns of Bouillon and Sedan."

"In Lorraine our advance guards are in Gravelotte, in the forts to the south of Metz and at Morhange and Dieuze."

"In Alsace we have reached Denon and Schirmeck. We are progressing between Sainte-Maire-Aux-Mines and Schlestadt. Further south we have pushed forward to Colmar and Ensisheim. Beyond these points we have Richcourt and Girey, Chateau Salins, Munster, Cernay and Altkirch, which have become French again."

"At noon Gen. Hirschauer, commanding the Second Army, made at the head of his troops solemn entrance into Mulhausen. Our troops have received the hearty welcome in the town, which is magnificently beflagged. The whole population, by unanimous acclamation, expressed their unshakable loyalty to France."

BASEL, Nov. 17.—French troops Saturday entered Colmar and Mulhausen, two of Germany's great fortresses in Alsace, according to a dispatch received here. There was no trouble in either place.

WITH THE AMERICAN ARMY IN FRANCE, Nov. 17, 7:30 a.m.—Gen. Pershing's forces moved forward early today in territory just abandoned by the Germans.

On the old line between Moulon and Thiaucourt, lying from the region of Sedan to the south of Metz, Gen. Pershing had been stationed to await orders for the advance and at 5:30 o'clock this morning the patrols marched out, not in line of battle but in columns along the high roads.

STAR GOLFER HELPS BATTLE THE "FLU."

MISS LANDRETH OF MIDWICK DOES FEARLESS WORK IN BAY CITY.

BY ALMA WHITTAKER.
Miss Mildred Landreth, formerly a star golfer at the Midwick Country Club, and one of the most popular of Pasadena's society girls, has been winning high eulogy for her fearless work as an ambulance driver in San Francisco. Thirty girls answered the call of the Red Cross headquarters and undertook to fetch and convey influenza patients to the hospitals, and Miss Landreth has worked early and late day in and day out, at this task for the past month. She has always handled an automobile like a young professional chauffeur and turned her skill to good stead in San Francisco's "flu" crisis.

AMATEUR STANDING BEFORE CONFERENCE.

(BY A. F. NIGHT WIRE.)
PHILADELPHIA, Nov. 17.—Matters pertaining to the amateur standing of athletes who acted as paid instructors at army camps during the past year, the awarding of championship and delegate representation are among the things that will be considered at the annual meeting of the Amateur Athletic Union of the United States, which began a two-day session here today. In the absence of Charles A. Dean, the president, the meeting is being called to order by Samuel J. Dallas, Philadelphia, vice-president.

RELANDS FROSH BEATS HIGH SCHOOL.

(RELANDS DISPATCH.)
RELANDS, Nov. 16.—The freshmen football team of the University of Redlands hung a 13-0 score on the High School football team here this afternoon in the first game of the season. Coach Cunningham used most of the freshmen boys who have been out for training and this includes some of the first-team men.

TAX BILL MAY KEEP CONGRESS ON DUTY.

(BY ATLANTIC CABLE AND A. P.)
WASHINGTON, Nov. 17.—Adjournment of Congress sine die a day or two before the third and last session of the Sixty-fifth Congress begins December 1 will depend largely on whether the Senate Finance Committee can report the reduced war revenue bill before December 1, and on the speed with which unfinished business is cleared up. New work connected with the conversion of the country from a war to a peace basis also may prove a factor. This week the Senate plans to dispose of the national "war time" prohibition bill by eliminating the rent profiteering amendment, which the House has refused to accept and which would prohibit the sale of any intoxicating liquors from next July 1 until the American army is disbanded.

ADJOURNMENT BETWEEN SESSIONS DEPENDS ON WORK OF SENATORS.

New work connected with the conversion of the country from a war to a peace basis also may prove a factor. This week the Senate plans to dispose of the national "war time" prohibition bill by eliminating the rent profiteering amendment, which the House has refused to accept and which would prohibit the sale of any intoxicating liquors from next July 1 until the American army is disbanded.

WASHINGTON, Nov. 17.—Adjournment of Congress sine die a day or two before the third and last session of the Sixty-fifth Congress begins December 1 will depend largely on whether the Senate Finance Committee can report the reduced war revenue bill before December 1, and on the speed with which unfinished business is cleared up. New work connected with the conversion of the country from a war to a peace basis also may prove a factor. This week the Senate plans to dispose of the national "war time" prohibition bill by eliminating the rent profiteering amendment, which the House has refused to accept and which would prohibit the sale of any intoxicating liquors from next July 1 until the American army is disbanded.

HEAT WITH PEARL OIL

The Guardian of Home Comfort

No matter what the weather outside, Perfection Oil Heater keeps dampness and chill from the house.

Lights at the touch of a match and gives long hours of cozy, cheerful warmth on one filling with Pearl Oil, the ever-obtainable fuel.

No smoke or odor. Easy to carry.

Cuts fuel bills, too, for less furnace heat and fewer grate and coal-stove fires are required. Oil consumed only when heat is needed—no waste.

Buy Perfection Oil Heater today. Dealers everywhere.

STANDARD OIL COMPANY (California)

PROFITS FROM CULLS.

Walnut Cracking Machine Saves
Hundreds of Thousands of Dollars
to Growers.

The California Walnut Growers Association, which has just harvested its new crop of English walnuts, has entered upon the task of shelling the culls and preparing them for market as selected nutmeats, by installing several new nut-shelling machines. These give

she's not quite yet the damper old bird that we're always known her. She is hobbled in a "nu" mask, and her head is cramped. She looks uncomfortable, even though she may not be.

When they threw the gates open at Vernon Saturday night and Tarpshire, in the health authorities were prepared for the emergency.

TURKISH

Masks. They were being worn about the neck—hanging there like a lode-stone. Or they were pushed up above one's left eyebrow. There were the kind with long, yard

the cull plant a greater daily capacity than ever before. Under favorable conditions, the output could almost be doubled.

These new machines were built to order at a cost of about \$4500 each. The machines formerly in use cost only about \$1700 each, and cracker only five tons of culls per day.

The cracking machine was invented by a walnut grower to fill an order for a local nutcracker association to market culls as a profit for several years. The culls business alone runs into many hundred thousands of dollars annually. The meats are used by bakers and confectioners all over the United States and Canada.

TONOPAH PROPERTY MAINTAINS OUTPUT

(SPECIAL CORRESPONDENCE.)

RENO (Nev.) Nov. 15.—Hugh H. Brown, Tonopah attorney, stopped off in Reno last Wednesday on his return from an important mission to Philadelphia, which was fraught with the deepest significance for the Tonopah industry at Seales Lake, Cal.

It appears that an acreage suit filed to control the entire industry has been ordered by the federal

[illegible]

idea blandly. Eileen Percy onstepped, masked in black tulle. Georgette, Juanita Hansen peered through a silver mesh veil. Numerous Mac Schenck girls appeared in harem veils, silk handkerchiefs, their escort's linen handkerchiefs, muffs. Some coyly hid behind warm fur coats. They sent their throats discreetly askant. The customary face-to-face attitude was properly abandoned. The dance nevertheless, was a merry round of pleasure.

A fat man futilely tried to indulge in a "swoon" via a strong run underneath his face. A courtier remarked:

"Oh, the boys," he said, as he dis-

buried the peasy thing. "I don't care; i dinna ken whether he'd hae ony
what becomes of me." — [Washington Times.

Jewelry for Little People

Inasmuch as we are especially asked to remember children this year, the following will prove acceptable gifts, surely:

Sterling Silver Baby Spoon

Sets—consisting of fork, spoon and food pusher, in sterling and Community silver.

Bracelets—gold-filled and solid gold; **Pin Sets**; solid gold **Neck Chains** or **Locketts**.

Comb and Brush Sets—finished in sterling silver.

(Jewelry; Main Floor)

Initialed

Novelty in

Handkerchiefs

Of fine, sheer material, with colored embroidered initials in three different shades and styles to the box (and, by the way, the boxes themselves are good gifts, for they are very artistic in design); boxes of three, 35c.

(Handkerchiefs: Main Floor)

**Novelty
Velvet Bags**

In black and all favored Autumn colors—brown, taupe, navy, purple, green—some with swinging purses and fancy colored linings; others in drop frame style, with mirror top; no newer bags are shown than these, and no better values, at \$5.

though Jers Unique is principally for garments—
\$7.50, \$8.50

Mikado Silk Suitings

In lovely pin checks and larger black plaids of dark suit shades, are sturdy in weave and delightful in conception; yard \$3.50

Satin Duvelyn

Will almost convince you that it is velvet, unless you look at it closely, so soft and shimmering is its finish. In dark colors, made with cloth back and satin

"There's a Reason"

TO CONTROL VAST POTASH DEPOSITS.

(SPECIAL CORRESPONDENCE.)

TONOPAH (Nov. 15.)—During the past month the Tonopah Division succeeded in maintaining its average of 200 tons a week from the mine to the mill of the Goldfield Consolidated. Two weeks ago the tonnage ran close to 260, and it is understood that the value will not fall below \$25 a ton and possibly a better. The development on the new levels in the mine has been

(twenty-six feet apart is giving the management great encouragement. The southeast drift on the 260 level is out a distance of 168 feet, having made eleven feet of progress since the previous report was issued and its face is breaking against a solid width of milling ore.

The Brougher Divide picked up the gold-ore body for which it has been driving and the management is elated over the assays of \$72, which were returned on the first samples.

Divide Division is in a position to press development owing to the fact that the mine has been

MAGNESITE DEMAND.

(SPECIAL CORRESPONDENCE.)

PORTERVILLE, Nov. 16.—Owners of magnesite properties in district are preparing for an increased business. Operations are expected to be less, transportation conditions will be normal. In view of the comparative cost of the California ore the demand is expected to be high.

COL. LITCHER DIES.

(EXCLUSIVE REPORT.)

VENICE, Nov. 15.—Col. A. Litcher, aged 75, a retired mine man, died suddenly at his home.

any body has been crosscut for installed and connections made with day. He is married by a wife and five children.

MAGNESITE DEMAND.
SPECIAL CORRESPONDENCE.
PORTERVILLE, Nov. 16.—Owners of magnesite properties in this district are preparing for an expected increase in demand. They are expected to be less, transportation conditions will be normal. In view of the comparative quality of the California ore the demand is expected to be high.

COL. LITCHNER DIES.
[EXCLUSIVE DISPATCH.]
VENICE, Nov. 17.—Col. A. Litchner, aged 75, a retired mine engineer, died suddenly at his home here.

BLOW OF PICK REVEALS LEDGE.

Miner's Random Stroke Uncovers Gold Ledge.

Said to be Richest Ever Known on Arizona Desert.

Expansion of Proved Ground in Bisbee District.

(SPECIAL CORRESPONDENCE.)

PHOENIX (Ariz.) Nov. 14.—A blow of pick and shovel, made by a miner, has revealed a ledge of gold in the Pima Mountains of Northern Arizona, which is reported to have made a phenomenal gold strike. The man—Joe Johnson, George Johnson and J. E. Briley—were detected by a chance, their day's cleanup from dry washing, when Johnson sought to remove his feelings by hitting a boulder with his pick. The rock broke and showed rich quartz, fairly speckled with gold. The float was traced a short distance to a ledge, containing the richest ever known on the desert, visible for a mile. There has been hurried development to a depth of thirty feet, and the samples are said to be as rich as on the surface. The find is about eleven miles from Quartzsite and is noted as the richest gold ledge.

Remarkable gold specimens have been brought to Phoenix from the ledge mine, which is located near Hayden. More than 1000 feet of tunneling has been done, and plenty of ore is being shipped to a smelter, concentrating mill.

The Grand Pacific property at Superior is shipping about 1000 tons of ore a month.

EXTENSION OF PROVED GROUND.

(SPECIAL CORRESPONDENCE.)

BISBEE (Ariz.) Nov. 14.—A notable extension of the proved ground of this district is being developed by the Bisbee Copper Mining Company, a Phoenix corporation, in the upper part of the district. The company has been mining claims lying south and west of the Grand Pacific property of the Copper Queen.

Practically on the same ground is the Bessie lease, which has cut off ore near the surface, and in a north drift at 200 feet, has a full drift face of 8 per cent. copper ore.

The Dunn shaft is passing 1700 feet of depth. Some pockets of high-grade ore have been found on the ledge.

PHOENIX (Ariz.) Nov. 14.—Construction has been begun on a new 150-ton mill for the Octave mine, one of the deepest gold properties in the Southwest.

A 100-ton ball mill, with the flotation annex, is to be placed on the property of the Silver Bell Consolidated Company, near Humboldt.

At Humboldt the Consolidated Arizona Smelting Company is turning out about 1000 pounds a month of copper bullion.

LATERAL-RIGHT ACTION.

(SPECIAL CORRESPONDENCE.)

PHOENIX (Ariz.) Nov. 14.—Claiming \$1,000,000 for "rocks sold and delivered" is a new way of stating a plaintiff is filing an extra lateral-right suit, or one in which the apex is the dominant feature. This is the way the Rochester Mining Company, a Phoenix corporation, is suing the Pima Mining Company, which is claiming the right to mine the Pima mine.

The litigation is predicated on the fact that the Pima mine is a lateral-right mine, and the Rochester Mining Company is claiming the right to mine the Pima mine.

C. E. Jarvis, one of the locators of the Nevada Hills mine at Fairview, has made a lucky strike on that property after the company turned it over to lessees who found rich ore that had not been dreamed of.

OPTIMISM AMONG OIL MEN.

America will be Called Upon to Supply Seventy-five Per Cent. of World's Needs.

BY A. R. HINTON.

Canvassed the oil men of the State to light a strong feeling of optimism as to the future of oil locally, nationally and internationally. Every country in the world from which reports have come is more or less short of needed oil, and most of them seriously so. The European oil fields—Gallia, Rumania and Russia—have all suffered and will not be able to supply a fraction of the needs of Europe, to say nothing of other parts of the world. America must furnish practically 75 per cent. of the world's needs and about 50 per cent. of the new demand will begin with the restoration of peace.

The vast merchant marine is being built up, and will be one of the greatest of the world. America must furnish practically 75 per cent. of the world's needs and about 50 per cent. of the new demand will begin with the restoration of peace.

BUSY IN MONTEBELLO FIELD.

(SPECIAL CORRESPONDENCE.)

Montebello, Southern California's latest and biggest find in oil, is now one of the busiest places in the Southland. Twenty-two months ago the Standard Oil Company opened the field with a 500-barrel well. The production of all the operating companies today is 25,000 barrels, and the development work done by these since the opening of the field represents close to 100 wells.

On the Durfee lease the Amalgamated Oil Company has a test well drilling at 8452 feet.

The Columbia Oil Producing Company on the Scott property is making good time. No. 1 started six weeks ago, is drilling at 1550. At this depth a shale that is showing some oil is being penetrated.

The General Petroleum is doing its share of the development work in the seventh field with work going ahead on five different leases. Two wells on the Ralph property are making hole at 2900 and 3200 respectively. No. 1 on the Garvey is drilling at 2900 feet. No. 1 on the Lieber lease is going nicely at 2000 feet. Ralph No. 1 is standing at 2100 and Stone No. 1 is drilling at 2000 feet.

The Petroleum Midway, Ltd., is one of the heaviest operators in the Montebello field. This company's operations embrace fifteen different leases and to date work has been done on twenty-seven wells. Fifteen of these are now being drilled.

The completions made have an aggregate production of 2500 barrels. The Darlington No. 1, lost by fire and showing an increase of over fifty barrels. Darlington No. 2 is drilling in open hole at 2154. The Prugh property No. 1 is drilling on iron at 1351. No. 2 is following at close to 700 barrels a day and making 25 barrels of clean oil. No. 5 is standing cemented at 1600. No. 4 is drilling in open hole at 1500. The Pima mine is producing 100 barrels a day of 19 gravity oil cutting 8 per cent. No. 2 is shut down at 2475 on account of a shortage of men. No. 3 on the Walters lease is also standing at 2600 feet for the same reason. No. 1-A, on the German, is making hole at 2600 feet.

RARE MINERALS, METALLURGY, CHEMISTRY.

There are actually reported to exist in the world a number of minerals which are of great value to the metallurgist and chemist. These are the rare minerals, and they are found in the most remote and inaccessible places of the world.

FREE GOLD TRACE.

SAN JUAN CAPISTRANO, Oct. 20.—Q: I enclosed 1 man and took you two small pieces of rock. Would you test same and see if they carry gold, silver or other values? An old subscriber.

A: No. 1 is of quartz, pyrite and arsenical pyrite; free gold trace. No. 2, lead-silver and arsenic traces; free gold absent.

Moscovite. LOS ANGELES, Oct. 21.—Q: I am handing you herewith sample of what appears to be mica. I discovered it in a mine in the Sierra Nevada. It is a beautiful mica, and I am sure it is of great value. Will you please advise regarding same, as it appears to be exceedingly pure mica, and I am sure it is of great value.

A: The sample is from a small "book" of mica. It is rather too brittle and decomposed for retail
